# Results of Prescribed Fire Survey

**Jarred Brooke**  
**Extension Wildlife Specialist**  
**2018 INPFC Meeting**

Purdue University is an equal access/equal opportunity institution.

## Background

### Why conduct this survey?

- Establish a baseline of Rx fire use in Indiana
- Identify Rx fire knowledge gaps
- Identify educational opportunities
- Provide a direction for future council efforts

## Survey – who, what, when, where, why?

- 52 questions

### ***Rx Fire Use***

- Rx fire experience, training, and knowledge
- Seasonality of Rx fire
- Vegetation types
- Purpose of Rx fire
- Rx fire barriers

## Survey – who, what, when, where, why?

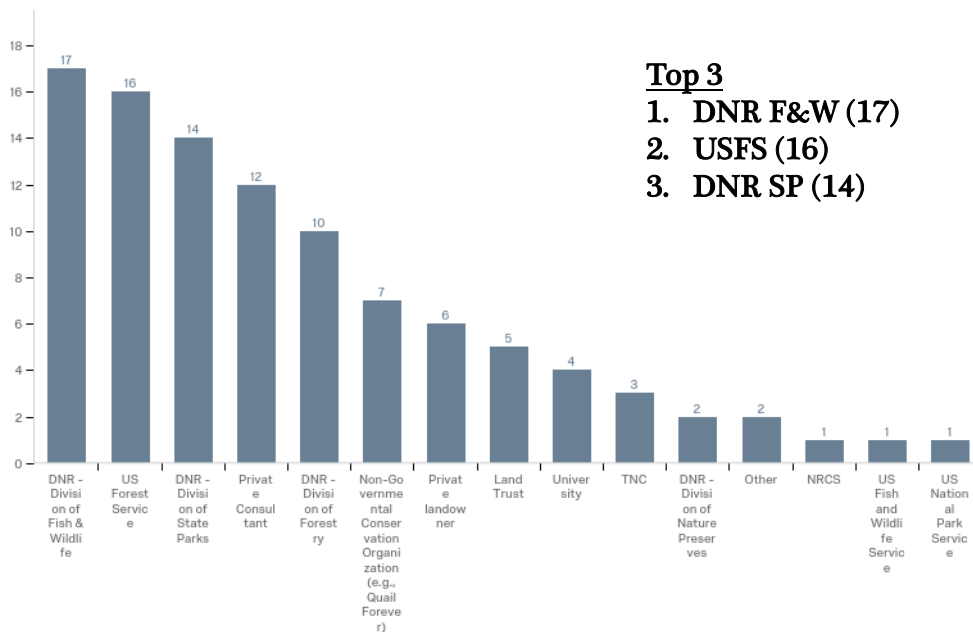

### *Rx Fire Technical Assistance for Private Landowners*

- # of landowners contacted about Rx fire
- Reasoning for recommending Rx fire
- Seasonality
- Vegetation types
- Perceived barriers
- Training opportunities

## Results

- **101 Respondents**
  - **43 State agency staff**
  - **19 Federal agency staff**
  - **15 NGO + Land trusts**
  - **14 Private consultants**
  - **6 Private landowners**
  - **4 University staff**

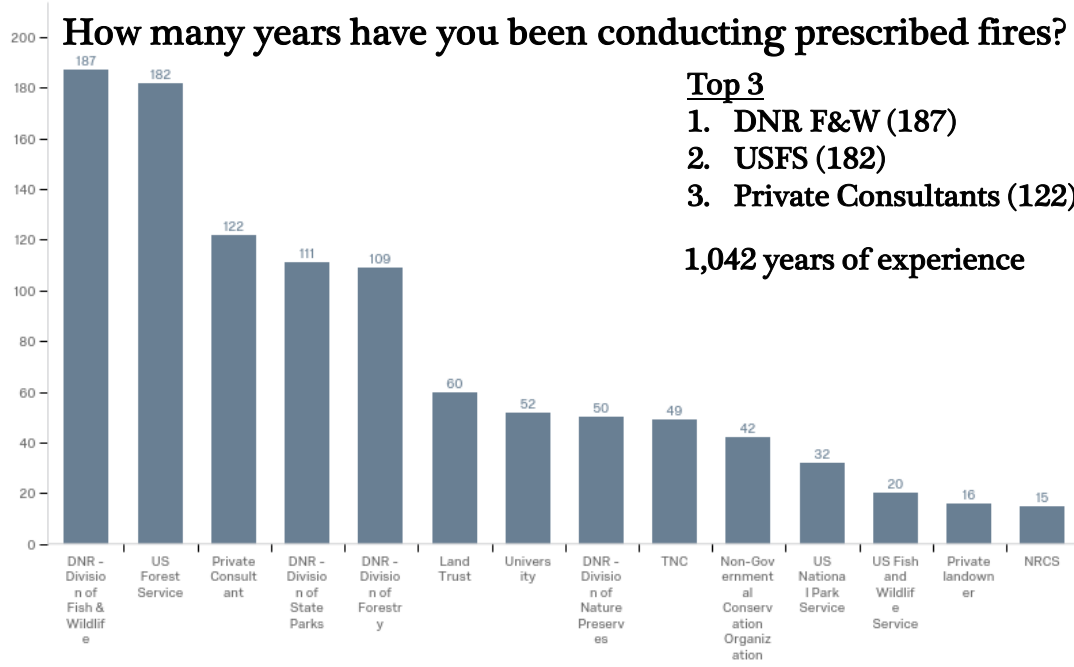

## Results - respondents

Purdue University is

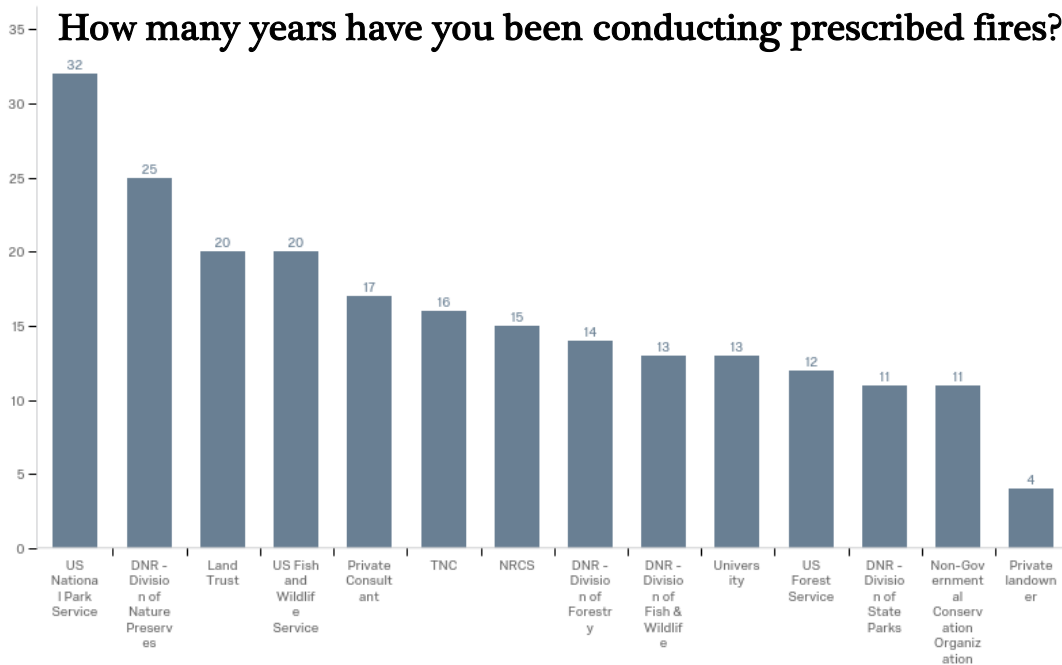

**E**  
TV

## Results - experience

## Results - experience

How many years have you been conducting prescribed fires?

Purdue

## Results - training

Do you have your Wildland Firefighter Type II (Red Card) Certification?

Have you attended the Indiana DNR's "Prescribed Fire for Managers“...

## Results - training

Outside of the requirements to become Wildland Firefighter Type II certified, how many prescribed fire trainings have you attended?

## Results - knowledge

How would you gauge your knowledge of these different topics related to prescribed fire?

■ Very knowledgeable ■ Moderately knowledgeable ■ Slightly knowledgeable ■ Not knowledgeable at all

## Results - knowledge

How would you gauge your knowledge of different topics related to Rx Fire?

Purdue University is an equal opportunity institution.

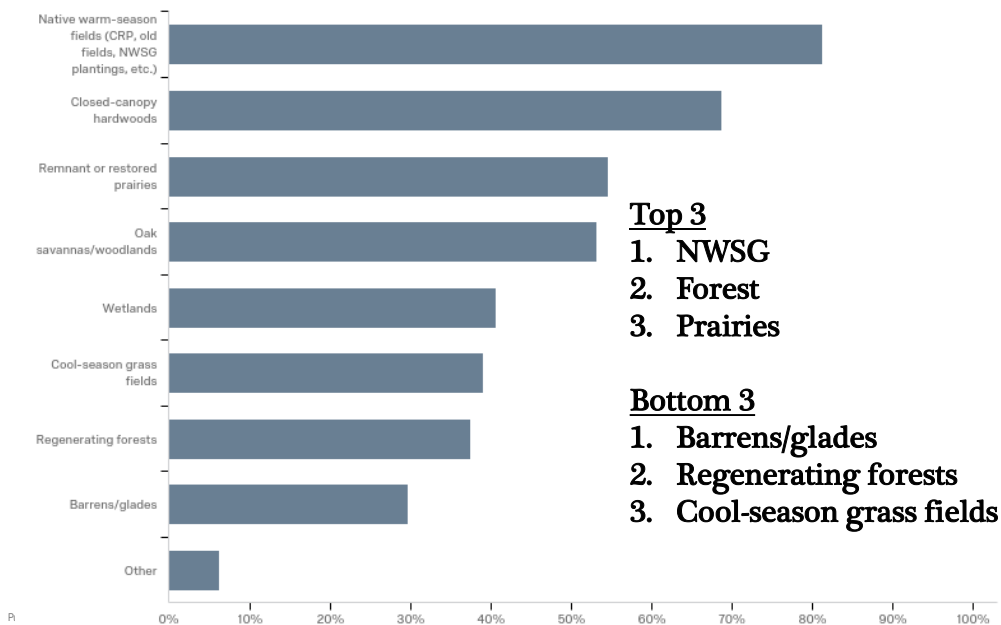

## Results – Rx Fire Use

Do you conduct prescribed fire on private or public land?

## Results – Vegetation types

In which vegetation types do you conduct prescribed fires?

## Results – Vegetation types

In which vegetation types do you conduct prescribed fires?

Forested (e.g., oak savannas/woodlands, closed canopy hardwoods, regenerating forests)      Non-forested areas (e.g., prairies, barrens/glades, native grass fields)

# **PURDUE** EXTENSION

## FORESTRY & NATURAL RESOURCES

### Results – Rx Fire Use

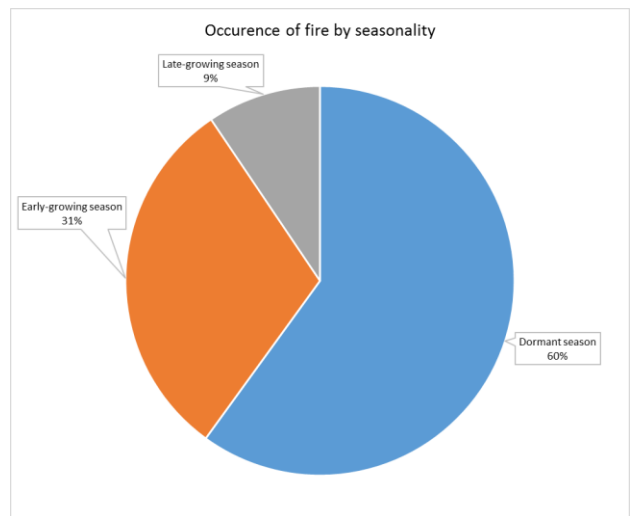

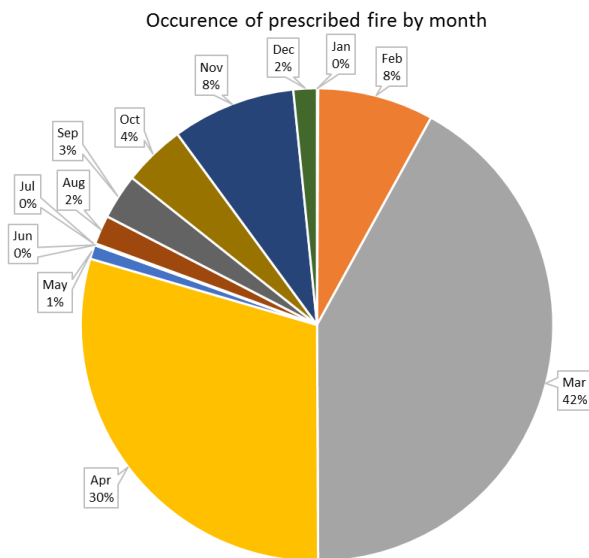

Purdue University is an equal access/equal opportunity institution.

**PURDUE**  
UNIVERSITY

## Results – Rx Fire Seasonality

Indicate what percentage of your prescribed fires occur in each month...

## Results – Rx Fire Seasonality

Please group the factors that influence the time of year you conduct prescribed fire.

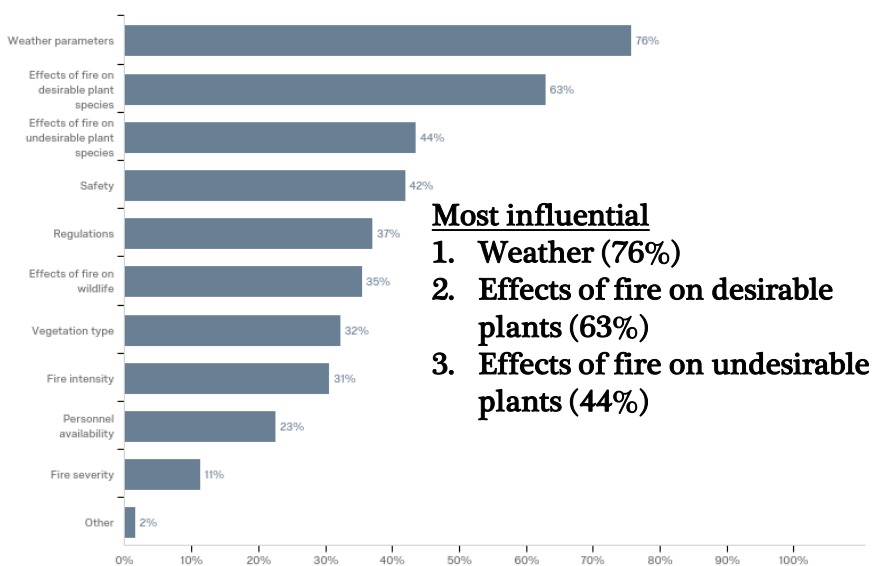

Purdue University is an equal access/equal opportunity institution.

## Results – Rx Fire Seasonality

Please group the factors that influence the time of year you conduct prescribed fire.

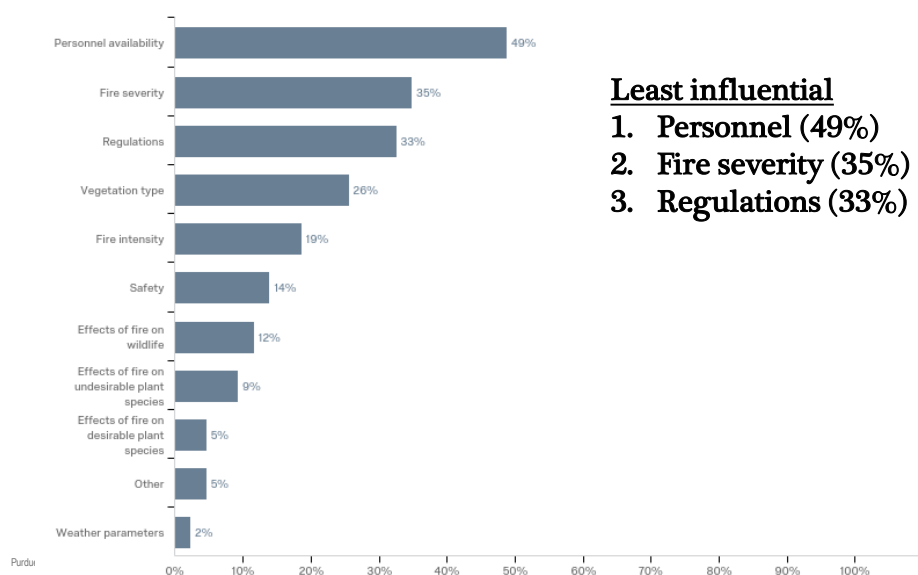

Q19\_0\_GROUP - Most Influential

## Results – Rx Fire Seasonality

Please group the factors that influence the time of year you conduct prescribed fire.

Q19\_2\_GROUP - Not Influential

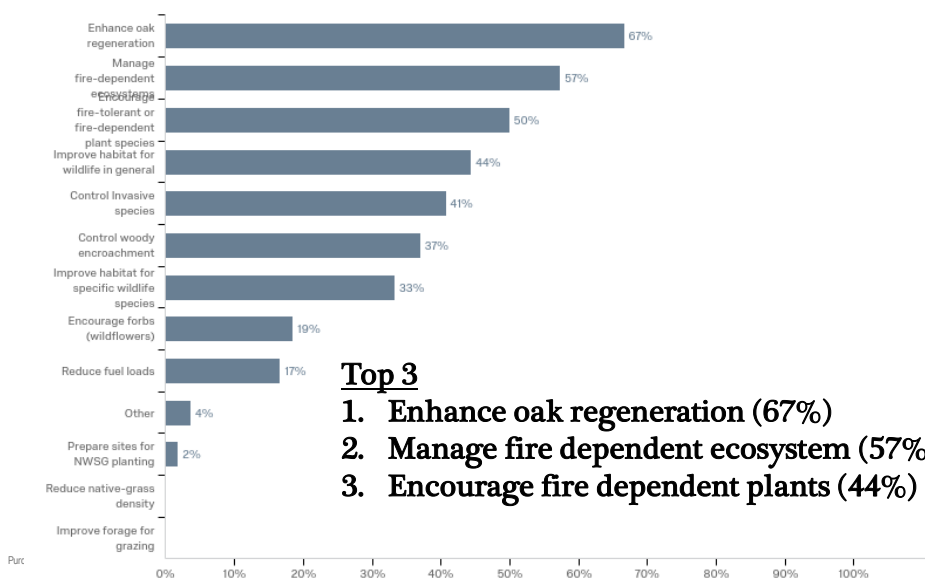

### Least influential

1. Personnel (49%)
2. Fire severity (35%)
3. Regulations (33%)

## Results – Reasons for burning (forest)

Please group the reasons you conduct prescribed fire in forested areas

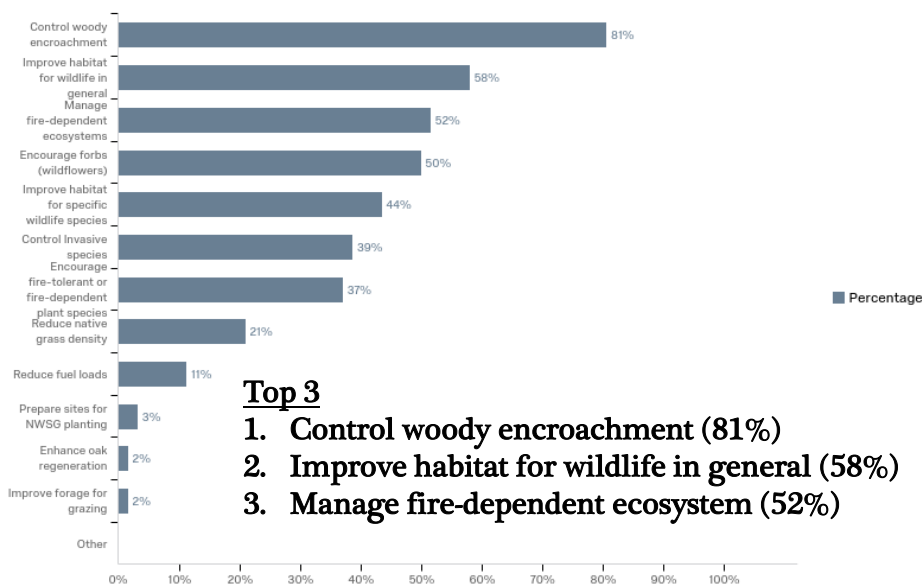

Q12\_0\_GROUP - Top Priority

## Results – Reasons for burning (non-forest)

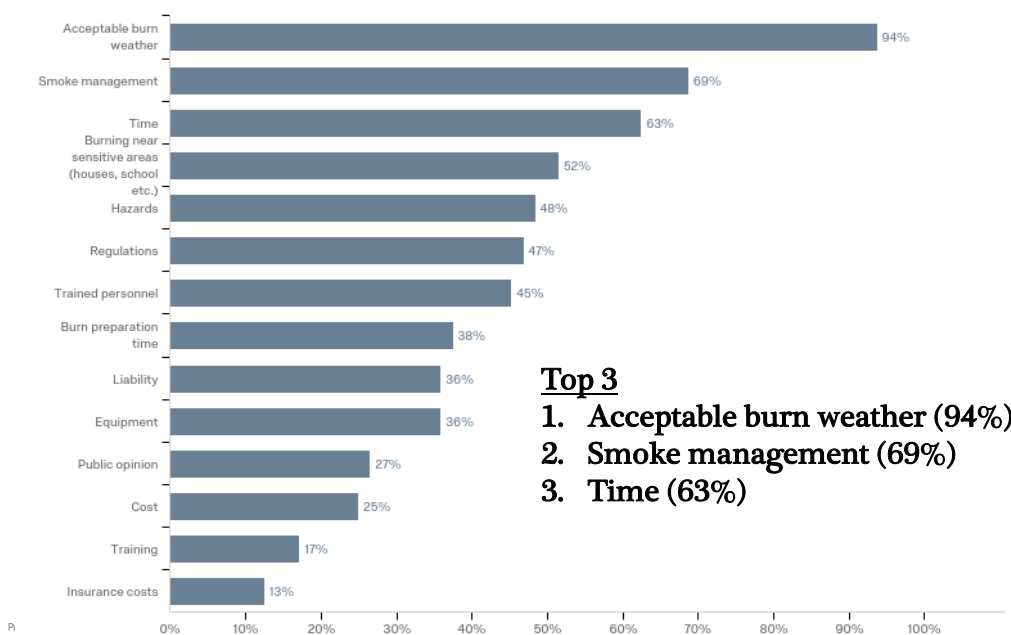

Please group the reasons you conduct prescribed fire in non-forested areas

Q65\_0\_GROUP - Top Priority

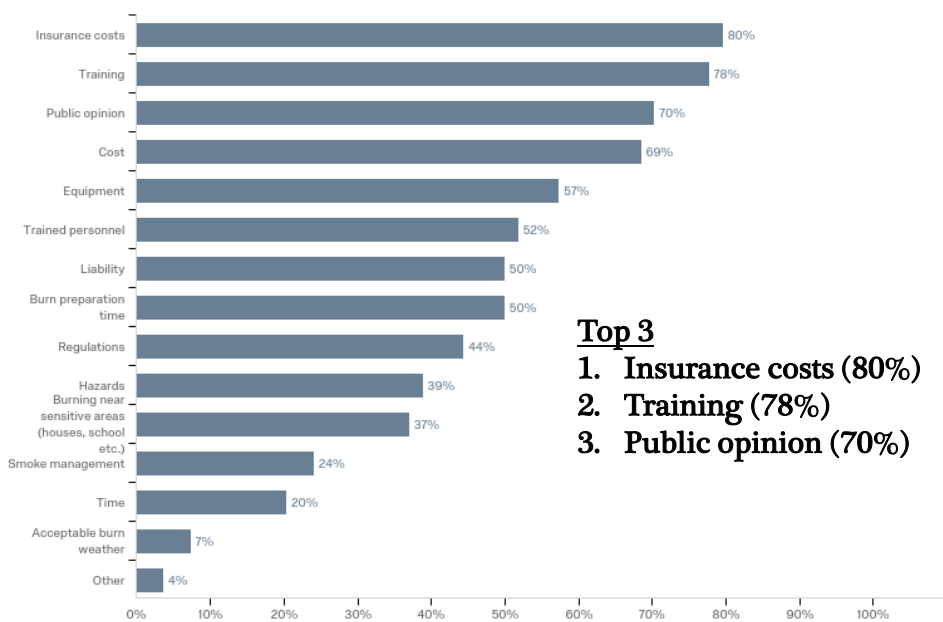

## Results – Barrier to Rx Fire

Q13\_0\_GROUP - Barrier

## Results – Non-barrier to Rx Fire

Q13\_1\_GROUP - Not a Barrier

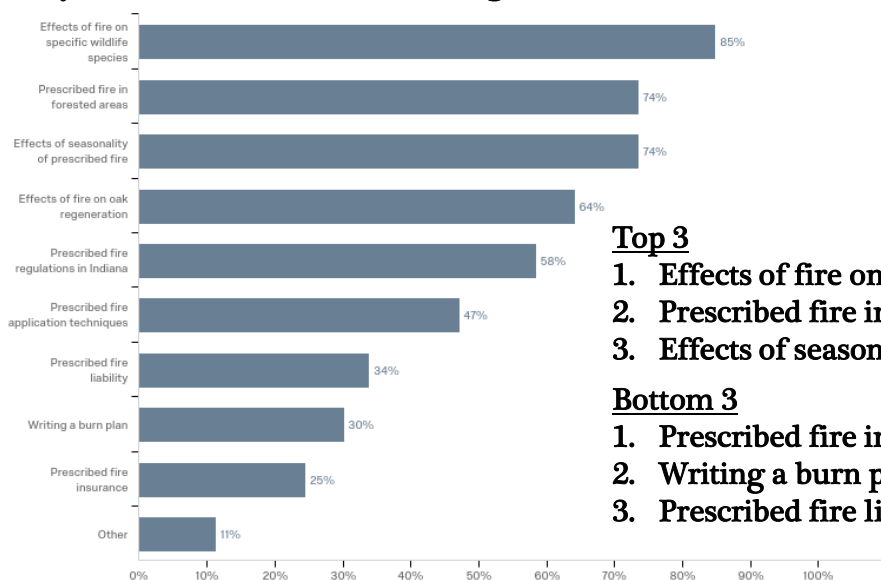

## Results – Training needs

Are you interested in seeking further training related to Rx fire?

## Results – Training needs

If additional training opportunities were available, which topics would you be interested in learning more about?

### Top 3

1. Effects of fire on wildlife (85%)
2. Prescribed fire in forests (74%)
3. Effects of seasonality of fire (74%)

### Bottom 3

1. Prescribed fire insurance (25%)
2. Writing a burn plan (30%)
3. Prescribed fire liability (34%)

# Technical Assistance for Landowners

Purdue University is an equal access/equal opportunity institution.

## Results – Technical assistance contacts

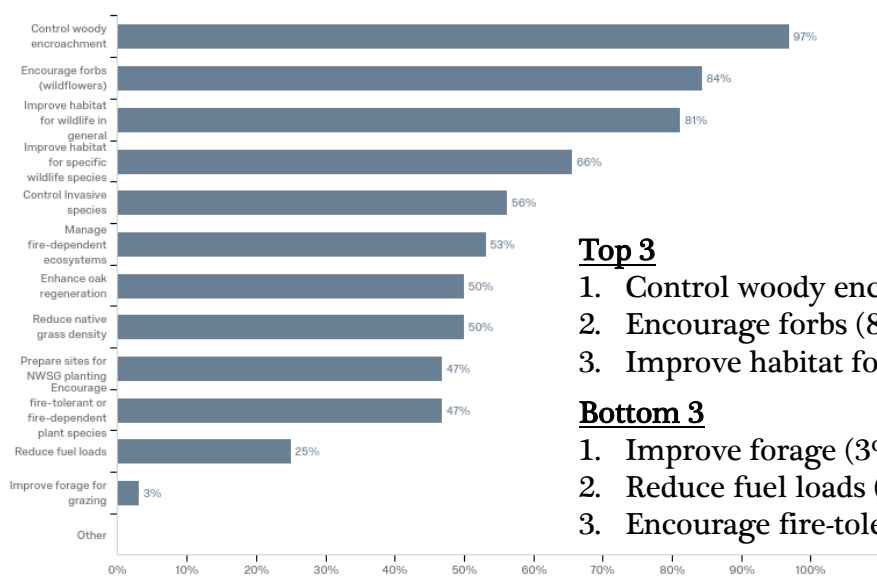

In an average year, how many landowners do you speak to regarding the use of prescribed fire.

Purdue University is an equal access

## Results – Why recommend fire?

Identify your reasoning for recommending prescribed fire to private landowners

### Top 3

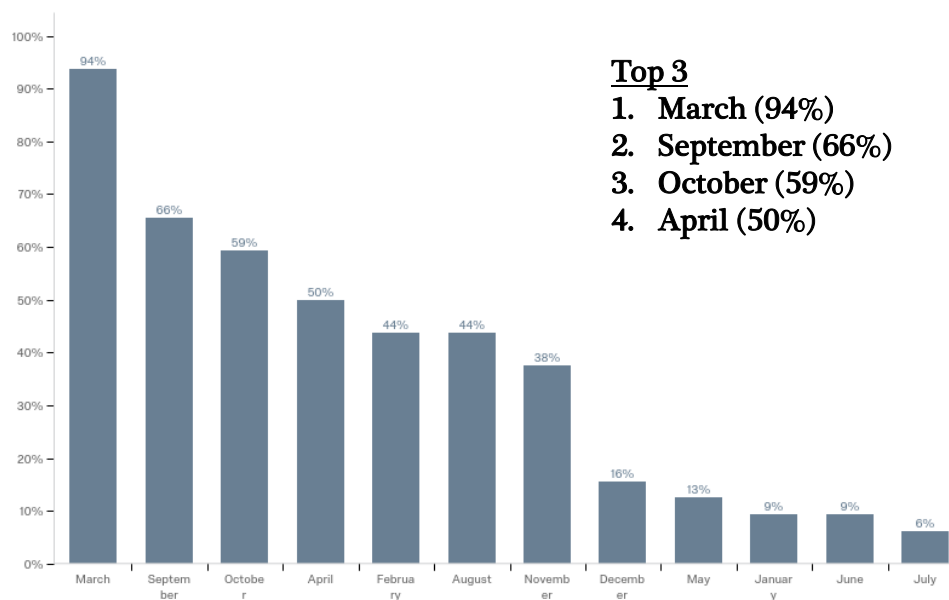

1. Control woody encroachment (97%)
2. Encourage forbs (84%)
3. Improve habitat for wildlife (81%)

### Bottom 3

1. Improve forage (3%)
2. Reduce fuel loads (25%)
3. Encourage fire-tolerant plants (47%)

## Results – When to use fire?

In which month(s) do you recommend landowners conduct prescribed fire?

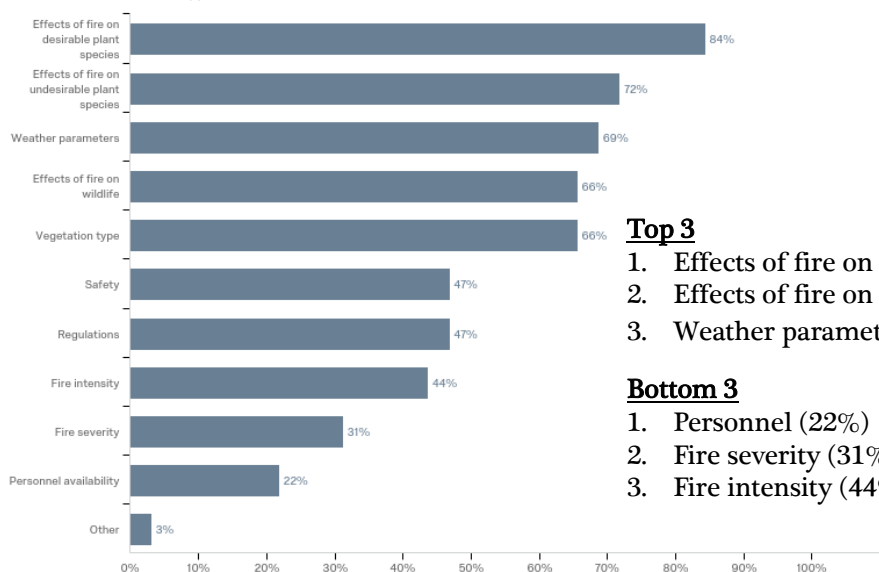

### Top 3

1. March (94%)
2. September (66%)
3. October (59%)
4. April (50%)

## Results – Factors determining when to use fire

Which factors dictate the month(s) you recommend landowner conduct prescribed fires?

### Top 3

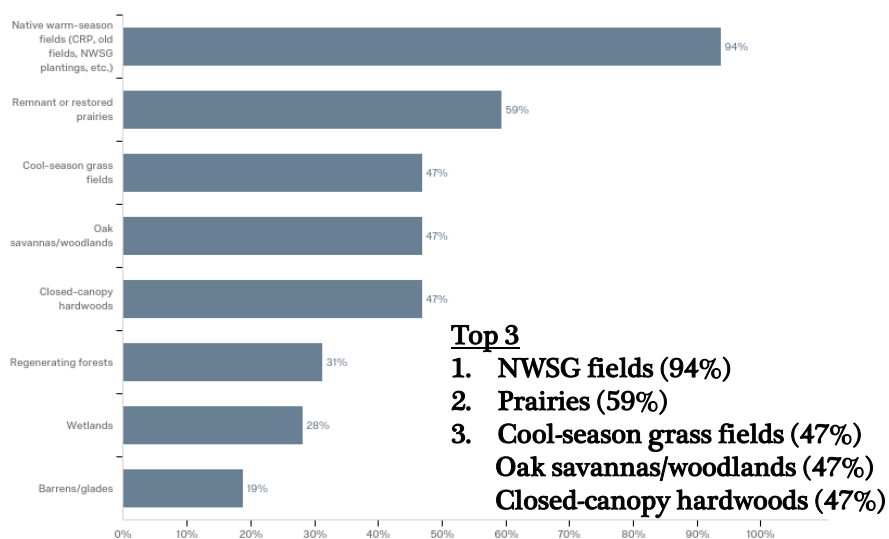

1. Effects of fire on desirable plants (84%)
2. Effects of fire on undesirable plants (72%)
3. Weather parameters (69%)

### Bottom 3

1. Personnel (22%)
2. Fire severity (31%)
3. Fire intensity (44%)

## Results – where to burn

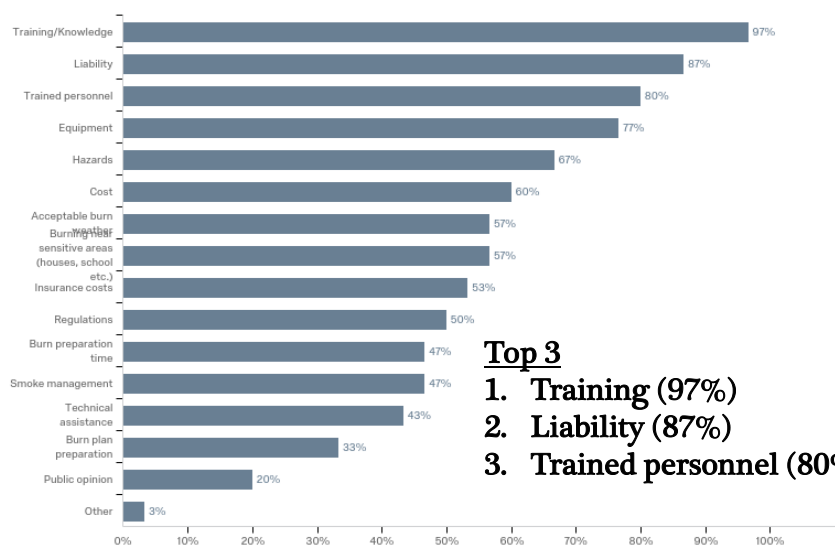

In what vegetation types do you recommend private landowners conducted prescribed fires?

## Results – Perceived barriers

Please group and rank the potential barriers to private landowners conducting prescribed fire.

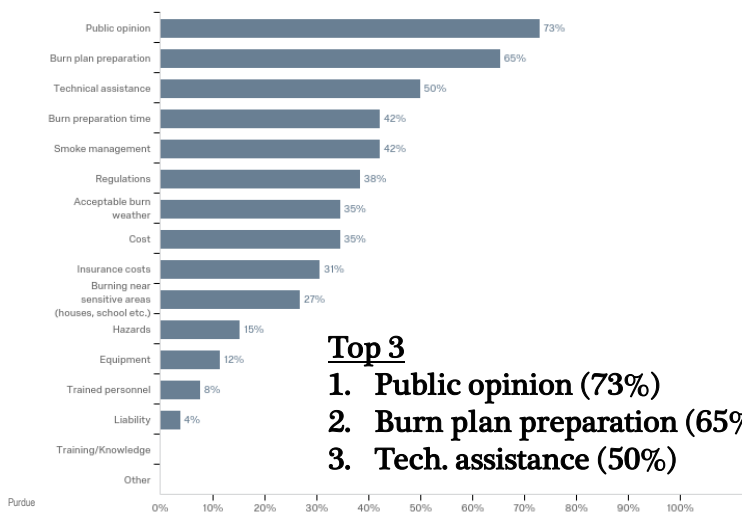

### Top 3

1. Training (97%)
2. Liability (87%)
3. Trained personnel (80%)

## Results – Perceived non-barriers

Please group and rank the potential barriers to private landowners conducting prescribed fire.

Q35\_1\_GROUP - Non-Barriers

## Results – Training needs

**Do you think private landowners are interested in seeking further education/training related to prescribed fire?**

## Results – Training needs

Which topics do you think private landowners would be interested in learning more about?

### Top 3

1. Prescribed fire application (91%)
2. Prescribed fire regulations (83%)
3. Prescribed fire liability (78%)

## Summary

### ***Rx Fire Experience/Knowledge***

- **4 State Agencies, 4 Federal Agencies, Land Trusts, NGOs, Universities, Private Consultants, Private Landowners**
- **+1,000 years of experience**
- **2/3 have been Red Card certification or more**
- **89% very knowledgeable or moderately knowledgeable about Rx Fire**
- **Still opportunities to improve knowledge level**

## Summary

### *Rx Fire Use*

- Mix of public and private land Rx Fire
- Majority of fire is in non-forested areas (61%)
- 72% of fires occur in March-April
- 60% in dormant season; 9% in late-growing season
- Weather & effects of fire = most influential on season of burn
- Burning in forested areas for:
  - Oak regen (67%)
  - Manage fire-dependent ecosystem (57%)
- Burn in non-forested areas for:
  - Woody encroachment (81%)
  - Wildlife (58%)

Purdue University is an equal access/equal opportunity institution.

## Summary

### *Barriers to Rx Fire Use*

- Acceptable burn weather (94%)
- Smoke Management (69%)
- Time (63%)
- Burning near sensitive areas (52%)

### *Training needs*

- 84% interested in more training opportunities
- Topics
  - Rx Fire & wildlife (86%)
  - Rx Fire in the forest (74%)
  - Effects of Rx fire seasonality (74%)

## Summary

### *Technical assistance to landowners*

- > 600 landowners contacted about Rx Fire
- Rx Fire is recommended to:
  - Control woody encroachment
  - Encourage forbs
  - Improve wildlife habitat
- Rx Fire is recommended in:
  - March (94%)
  - September (66%)
  - October (59%)
  - April (50%)
- Season is recommended because:
  - Effects of fire on plants
  - Weather parameters
- Rx Fire is recommended mostly in:
  - Non-forested areas (94%) vs. Forested areas (47%)

Purdue University is an equal access/equal opportunity institution.

## Summary

### *Technical assistance to landowners*

- **Perceived barriers**
  - **Training (97%)**
  - **Liability (87%)**
  - **Personnel (80%)**
  - **Equipment (77%)**
- **Training needs (Yes; 75%)**
  - **Rx fire application (91%)**
  - **Regulations (83%)**
  - **Liability (78%)**
  - **Rx fire and wildlife (65%)**
